MODEL: *BR07*

The BOREA BR07 floorstander is a clever design, using a two-and-a-half-way configuration. A compact speaker at a reasonable price, it offers great dynamism and excellent performance in the low frequencies.

It incorporates a new 25mm EFS silk dome tweeter; a 16cm midrange/bass driver in natural cellulose paper for a perfect neutral tone of voices and a 16cm bass driver in fiberglass powerfully motorised.

The two 16cm transducers work simultaneously in the same volume load offering an incredible delivery of lower frequencies. Each driver has a different crossover keeping the details and the width of the vocal range. This floorstander will fit perfectly in rooms ranging from 15 to 30m<sup>2</sup>.
