

Vento 100

- 3-way bass reflex system
- 400 watts
- Titanium-graphite technology
- Magnetic fabric grill

€2,349.00 *

inkl. MwSt.

The modern look of the new Vento

We've redesigned the look and technology of our Vento premium speaker series. Thanks to the modern design, with discreetly curved side panels, rounded cabinet edges and high-quality surfaces with a perfect finish, the new Vento speakers have a very self-assured appearance. The harmoniously proportioned premium speakers offer a perfect balance between timeless elegance and powerful performance. This makes the Vento models universally applicable - they are an enrichment for the most diverse living spaces. Our flagship speaker in the series, the Vento 100, looks elegant and refined, despite its impressive cabinet size. Thanks to its excellent technical components, the large 3-way bass reflex floor-standing speaker inspires with its stupendous dynamics and makes the hearts of audiophile music fans beat faster. The Canton Vento 100 impresses with its incomparably good Canton sound, maximum durability and finest workmanship.

Titanium Graphite - high-quality technology

Our flagship Vento 100 speakers are equipped with newly developed drivers in the midrange and woofer range, which are visually recognisable thanks to their titanium graphite diaphragms. The drivers have an understated elegance due to their matt shimmering titanium graphite diaphragms, giving the Vento speakers a noble appearance. They nestle seamlessly into the high-gloss lacquered baffles without any visible screw connections. At the same time, our double cone technology and the wave surrounds capable of particularly large excursions ensure impressive dynamic capabilities. The new titanium graphite drivers are very stiff and have excellent damping properties. In addition, the new drivers work as perfect piston transducers and thus offer ideal conditions for reproducing acoustic signals one-to-one, without losses. The result: the speakers sound dynamic and relaxed in any music style.

Noble enclosures for the best sound

The new cabinets not only look very high quality, they also have to meet our high technical requirements. The revised design ensures that more interior volume is available to tune the speakers with more bandwidth in the low frequency range. As a result, the new Vento speakers perform with even more contour and cleanliness. In addition, the sharp-edged cabinet radii, the modified base and the new basic shape ensure less sound interference from the cabinet itself. The newly designed plinth makes the Vento 100 appear to "float", giving

the stately floorstanding speaker a light and elegant appearance. In addition, the base design ensures that the speaker is particularly uncritical in its placement. Thanks to the different cabinet finishes available, the modernly designed and timelessly elegant Vento loudspeaker models feel at home in many interior design styles. At the same time, the cabinets of the new Ventos meet the highest standards of workmanship and touch quality. The premium speakers are available in white and black "high gloss" lacquers.

Eyes on the details

The speaker terminals in the new Ventos have been redesigned both visually and technically to ensure maximum conductivity. The solid screw terminals, designed in single or bi-wiring construction depending on the Vento model, hold cable cross-sections of up to 10 mm² and offer the possibility of accommodating speaker cables with banana plugs or fork bridges. The new terminals have a special high-quality and conductive material, with new terminals and a finer thread. As a result, we achieve reference-worthy contacting in the Vento series as well for perfect sound development and long-term stable contact to connected amplifiers. The innovations of the Vento series continue with the high-quality fabric covers. If necessary, they conceal a direct view of the technology and hold onto the baffles with powerful magnets. The straight top and discreetly curved bottom panels in black provide an unobtrusive, calm exterior.

High-quality crossover

In order to optimise the reproduction characteristics of the Vento loudspeakers, we only use components with the lowest tolerances and selected for their sound quality in the crossovers. High-quality core coils and MKP and MKT foil capacitors made in Germany ensure excellent series consistency and low tolerances. We achieve special voltage stability through optimally dimensioned components, with sufficient reserves for highly dynamic reproduction with the lowest possible distortion. In order to exploit the acoustic qualities of the loudspeaker series, the components of the crossovers are mounted in vibration-optimised bearings. In

CANTON

addition, elaborate measurements and listening sessions ensure acoustic fine-tuning that makes the Vento 100 speakers the sonic benchmark for the entire series.

Type	Floorstanding Speaker
Engineering Principle	3-way bass reflex
Nom. /Music power handling	220 / 400 watts
Frequency response	20...40.000 Hz
Crossover frequency	170 / 3.200 Hz
Woofers	2 x 220 mm (8,7"), Titanium-graphite (Wave surround)
Midrange	1 x 174 mm (6,8"), Titanium-graphite (Wave surround)
Tweeter	1 x 25 mm (1"), Ceramic
Warranty	5 Jahre
Nominal Impedance	4...8 ohms
Dimensions (WxHxD)	32,5 x 115,5 x 42 cm (12,8" x 45,5" x 16,5")
Weight	39,2 kg
Carton Content	Vento 100 Fabric grill (black) Manual
